

Paintball Markers/Tippmann

Xtreme-pro - 400 paintball gun R295 Xtreme-pro - 4 Cottonmouth paintball marker R795 Smart Parts Barrel Thred Metalic blue and black, this marker is not to be trifled with. A combination of aluminum alloy and hard rubber , it is lightweight and has an effective range of up to 160 feet. The gun's range and speed is fully adjustable and is also semi-automatic. Cock the hammer back and you're ready for action!

The Xtreme-pro operates on CO2 or compressed air tanks which can be connected near the bottom of the handle. The hose connecting the air tank to the barrel is a heavy-duty braided wire mesh . The rubber, pistol-grip handle is form-fitted to either hand for a comfortable, sure grip. A ribbed, aluminum-constructed second handle is placed further towards the barrel, ensuring an accurate shot. A direct-feed hopper reservoir is located on the top of the frame near the center of the marker. A grooved bracket near the back of the marker will accommodate a scope.

Tippmann A5 with Factory Installed Response Trigger R2495

The Response Trigger System is the ultimate big game fire power. The Response Trigger System increases your trigger speed by resetting the trigger and sear with excess gas during firing. This gas is used to operate a cylinder behind the trigger to do the resetting. The pressure of your finger on the trigger pulls it back to fire the next shot. The speed is determined by the amount of flow through the knurled adjuster on the side. The upper limit on the rate of fire is set by this adjuster.
