

Upgrades & Spare Parts

Cyclone Feed System R695 The A-5 Cyclone Feed system is now available for your Custom Pro or 98 Custom marker. The cyclone system is linked to the air system for synchronized ball feeding. Reduces breakage and jamming.

The faster you shot, the faster it feeds! up to 15 balls per second. BT4 RIP CLIP R695 Fits all BT4 combat marker

- Force feed, Sound-activated, with RIP Drive
- Holds over 200 paintballs
- Features Patented HALO Technology Zero Kick Hammer R550 he Zero Kick Hammer™; is most profound performance upgrade you will ever experience in a Tippmann or BT Marker. Using our patent pending MRT Technology™; we have reduced the internal moving mass of the bolt assembly by nearly half. Say goodbye to the clunky, kickin' like karate, hand-numbing, operation that you have come to expect from Tippmann style markers. Say hello to a new age of smoother cycling, higher rates of fire, and above all else... Squishy Paddles R160 Squishy Paddles now also in Super Soft Pink ,perfect for Pepper Balls R160

Cylone Feed Squishy Paddles are designed to help players using any Tippmann Cyclone Feed eliminate ball breakage due to cold temperatures, brittle paint and high feed rates and pepper balls. Lightning Rod R250 The Lightning Rod is designed to work in conjunction with our Vortex Mod and Quick Exhaust Piston Housing. Together, the parts will yield higher rates of fire, and increased air efficiency. The secret to the performance gains is the brass bushing located where the ratchet and piston rod met. The Lightning Rod is made of 7071 grade anodized billet aluminum which is stronger than any other like it.

Tippmann Cyclone feed mod kit R500

Full Tippmann cyclone feed mod kit R725

The Vortex Mod is specifically designed to be the fastest, smoothest actuating, and most durable/long lasting upgrade available. he Vortex Mod will feed upwards to 30+ balls per second and continue to load down to pressures as low as 150psi. Stock parts only feed up to 15 balls per second and only down to a pressure of 400 psi

Xtreme-pro TFPH R250

The TFPH is designed to rapidly vent the blast of air that is used to advance the loader. By venting the gas quickly, the loader responds instantly. This equates to faster loading with lower pressure.

Xtreme-pro Speed Demon Power Tube R325

The Speed demon Power Tube accessory from Xtreme-pro is a black anodized aluminum power tube. Direct replacement for the stock plastic power tube in the A5 or X7. the tube is precision machined aircraft aluminum, then black anodized. Our tight fitting front velocity screw design keeps your front velocity set no matter how hard you play! Use with stock valve and internals. Includes one power tube and one front bolt.

Tippmann Front bolt R155

the Xtreme-pro Tippmann Front bolt is made of air craft grade aluminum and is designed to replace the plastic front bolt on the power tube, goes with cyclone upgrades for higher ,smoother rates of fire.

Tippmann TPX Pistol Magazine 2 Pack R450

Xtreme-pro Tippmann Double Trigger kit R180 The double trigger kit is a drop-in kit that replaces the single trigger and trigger guard. The kit includes a double trigger and a tournament legal trigger guard. Features

- 2 Finger trigger with guard that allows for faster firing and less finger fatigue

Tippmann A5 Metal Blade Trigger kit R255

This metal trigger has a much better quality than most other Tippmann double triggers. The double trigger kit is a drop-in kit that replaces the single trigger and trigger guard. The kit includes a blade double trigger and a tournament legal trigger guard. To install the double trigger simply remove all gas sources and disassemble the marker to the point of removing the left half of the markers receiver. Remove the single trigger and guard. Then replace with the double trigger and guard. Now replace the receiver half. It's that simple! Works with the Tippmann A5 Basic and A5 Egrip. With the A5 Egrip just remove the pin on the trigger. Tippmann A5 Response Trigger kit R750 Give your Tippmann A5 the power of the RT Kit. Just like the Model 98 RT Kit, this kit will give your gun a full auto effect. Once installed, you will be able to adjust the rate of fire that your A5 can output. Your trigger will have a "sweet spot" in the middle of its pull.

Xtreme-pro Spring sets 5pcs R110 Xtreme-pro Series Velocity Power Springs

- No Cutting

- Easy Installation Raise and lower velocity with precision control in any temperature, altitude, or condition! Xtreme-pro kill spring R95 9pc Spring Kit R150 For Spider and Xtreme-pro guns A nine piece spring kit with three Main Springs, three Standard Valve Springs, and three Compact Valve Springs. Springs color. Light springs: Black, Medium Spring: Silver, Heavy Springs: Gold.

Tippmann O-ring kits A5,98 or X7 R60

- All the basic o-rings you could need for your paintball gun

Tippmann A5 parts kit R140 Tippmann E-Trigger for bravo one R1000 Tippmann E-trigger A5 R1395 The Tippmann A5 E-Grip Kit with Selector Switch is a serious upgrade for your Tippmann A5 marker. A right side thumb switch lets you switch from Safe to Semi to your choice of firing mode on the fly. A new Hall Effect magnetic switch activation last seven times longer than the previous physical microswitch activation and allows for resistance-free trigger activation. A new rear access battery door means no more having to take the gripframe apart to change the battery and less pinched wires. A serious re-design for one of the most serious upgrades you can do to your Tippmann A5 XRadar Chronograph R1200 This chronograph measures both your feet per second to keep you safe, AND how many balls per second (bps) your gun is shooting. Features:

- 3 digit readout

- 200 - 399 feet per second (fps) capability

- 4 - 30 balls per second (bps) capability

- Requires one 9 V battery (not included) Tippmann Spare Parts Ball Lach R35 Push pins R25 Velocity screw R45 A5 End cap R38 Xtreme-pro 3/4 ball lach R20
