

Paintball Masks

The Switch™ EL™ Goggle System has the same great features as the FS™ system, but is slightly different in its design. The EL™ system comes standard with a solid one-piece facemask and a single pane fog resistant lens. Additionally, the single pane tirodial lens is treated with an exterior hard coat for abrasion resistance. The Switch™ EL™ system is available in Black and Woodland Camo.(comes with clear lens)

Proto switch EL real tree cammo R385

Proto switch Black smoke lens R175 The Proto Switch goggle system offers some of the premiere lenses in the paintball industry. With a variety of styles and colors available, you will never have a problem finding the best lens for your playing conditions. The tirodial lens gives the ultimate in vertical and horizontal peripheral vision. All lenses have perfect optical clarity and all Switch lenses provide 98% UV protection, insuring you have the best in performance from the first name in paintball.

Proto Switch FS Cammo or Black R550 + FREE MASK BAG

- Silicone woven rubber goggle strap. The retention strap is design to be adjusted to fit your head and stay fitted to your head.
- Tiger tooth strap buckles will allow you to adjust your strap for a custom fit and bit down to secure the strap. Just set it and forget it.
- The multi-ported ear piece provides unrestricted audible transfer to take place without sacrificing any ear protection.
- The incredibly simple 1/4 turn buckle (patent pending) makes the hassle of changing lenses a thing of the past. Simply turn the locking tabs to the right to unlock you lens frame. Pop out your old lens, drop a new one in, place the frame over the lens into position, and turn the tabs back again to lock it in.
- Uni-directional venting drastically reduces re-ventilated fogging. The venting also assists in keeping you cool and breathing easy.
- The first triodial lens in the world of paintball. Giving the player the ultimate in vertical and horizontal peripheral vision. All Switch lenses have perfect optical clarity, setting a new standard in visual performance.
- Self venting, low profile and removable, the Switch visor is able to pivot up and down for easy lens replacement.
- FS mask is softer than EI mask so ball can bounce off.
- Duel pane Thermal lens JT Flex 8 cammo R795
- Uses the most widely used goggle and lens combination in the industry (290 degree Spectra 2)
- Revolutionary exoskeleton frame is created using JT's exclusive state of the art "Dual Fusion" technology, which allows the system to be structurally efficient while maintaining the softness, flexibility, and ventilation winning players demand.JT Alpha Cammo Thermal R525

Features:

- * 190 degree field of vision
