 Features: Provides On/Off capabilities Hit previously untouchable targets with new curve features. Adjustable ramp switch &ndash; choose the desired level of the curve. Left hook, right hook, dive bomb shots and long flat trajectory shots with a twist of the barrel.&ldquo;Dial In&rdquo; targets and change the level of curve. Easy to clean

Tippmann A5 UMP shroud R595 The Xtreme-pro UMP Shroud for the Tippmann A5 not only transforms the A5 marker, but it adds to it tactical functionality the true Milsim/Scenario player demands. Patterned after the H&K UMP .45, the UMP Shroud can either transform the Tippmann A5 into an intimidating Sub-Machine Gun for CQB or when combined with other quality Xtreme-pro components to create an original design.

FEATURES: Light-weight steel construction (less than 1 1/2 lbs) Mounts to marker frame, allowing for easy barrel replacement Designed to fit most models of stocks including all the folding models (does not fit the MP5 Sliding Stock) Length: 37cm Powder Coat finish Designed as a near perfect replica of the real world firearm

Tippmann A5 Flatline Barrel R935

The Flatline Barrel System is the first production back spin barrel ever produced. The principle behind the system is Tippmann's newly designed slightly curved barrel, which applies centrifugal force to the ball, creating backspin. Not only does this system offer increased accuracy and distance but also offers flat trajectory for thick brush and canopy play. By minimizing trajectory of the ball and increasing accuracy, you increase the amount of targets which would ordinarily be out of range. The Flatline Barrel System adds 30m of flat trajectory GUARANTEED.

Tippmann X7,Phenom Flatline barrel R935

A5 Flatline Barrel Mill shroud R450 A5 Flatline barrel Mill shroud and flatline barrel R1200 FEATURES:

Aircraft Aluminum Body with holes
